PROFESSIONAL SUMMARY

Result-oriented Software Engineer with over 3 years of experience building, deploying, and scaling robust mobile applications, primarily in the FinTech domain. Proficient in state management (BLoC, Provider), REST API integrations, and delivering seamless user experiences. Experienced in developing complex financial platforms, including Loan Origination Systems (LOS) and comprehensive digital banking tools, with a strong focus on clean architecture and maintainable code.

SKILLS

- **Languages & Frameworks:** Dart, Flutter, HTML, CSS, Bootstrap, Figma
- **Architecture & State Management:** Clean Architecture, BLoC, Provider, GetX
- **Database & Backend:** SQL, Firebase (Firestore, FCM), Hive, SQFlite, REST APIs
- **Analytics & Integrations:** Git, GitHub, Razorpay, CleverTap, Mixpanel, Google Maps API, OpenAI API

EXPERIENCE

Novac Technology Solutions
Oct 2025 – Present

Senior Software Engineer

- Spearheading the mobile development of a comprehensive Loan Origination System (LOS) product, enabling streamlined loan processing and underwriting workflows.
- Designing and implementing scalable application architecture utilizing modern Flutter state management and Clean Architecture principles to ensure long-term maintainability.
- Collaborating closely with cross-functional product and backend teams to translate complex financial business requirements into intuitive, highly responsive mobile interfaces.
- Establishing robust code review practices and performance profiling to ensure high-quality, modular code delivery across the mobile engineering team.

Neurealm (formerly Gavs Technologies)
Jul 2023 – Oct 2025

Software Engineer

- Engineered and modularized core FinTech verticals for the ABCD Aditya Birla Capital app, including Stocks, Life Insurance, Health Insurance, and Mutual Funds.
- Implemented secure payment gateways facilitating UPI, international transactions, and online bill payments, alongside a robust resume-journey feature to boost user retention.
- Integrated diverse third-party SDKs, incorporating Mixpanel for advanced analytics, CleverTap for personalized engagement, and Google Maps for location-based services.
- Optimized application responsiveness and reduced load times by refining state management strategies and implementing efficient local data caching using Hive.

EDUCATION

Mobile Development using Flutter
2022 – 2023

Brototype, Calicut

BA English Literature
2019 – 2022

University of Calicut

Diploma in Functional Arabic
2019 – 2022

National Council for Promotion of Urdu Language
